Empowerment through Investment
A Quick Basic Guide to Investing

Kokayi Kwa Jitahidi
April 26, 2021
Outcome

To **empower** you to take greater control of your economic condition through the sharing of easy-to-understand facts.
Why Invest?

- Having a job is crucial. BUT.......  
- Wages from jobs are barely keeping up with costs.  
- Investing helps subsidize income from work and other sources.  
- Earning are greater than savings accounts (savings accounts ½ of 1%).  
- Work and time can provide a “nest egg”.  
- No guarantees.
Investment Goal

What does empowerment (from investing) look like in your life?

Drafted K. Kwa Jitahidi 04/26/21
Investment Objective

What are a couple concrete, time sensitive investment-driven accomplishments that would give life to your empowerment?
My Investment Values

- Prioritize value investments (i.e. good price).
- Prioritize companies that bring new tools to the masses for daily use.
- Long term investments.
- China.
- I am not a day trader.
Investment Materials

- Cash
- Budget
- A commitment to learn
- A strategy that assumes the proper risks
Investment Risk

• Risk involves the degree of uncertainty about the outcome(s) of an investment decision.
• Risk can be mitigated by historical information but never eliminated.
• Risk is driven by perceived importance.
• Stocks are priced to account for risk.
• Less risky stocks are priced higher for higher demand.
• More risky stocks are priced lower for lower demand.
Basics of Profit

PRICE

Customer Demand
Product Supply

Worker Wages & Other Labor

Number of Workers

COST

Debt, Taxes
Risking for Your Empowerment

Remember what empowerment looked like in your life.

What is the level of risk you willing take in stocks?

Definition of Stocks

• A portion of ownership (stock) in a company made available for purchase by the public.
  
  *Hence when a company begins selling stock, we say they’ve gone “public”.*

• Companies sells stock to raise $$$ for its operations.

• Company will pay investors dividends.

• The two most common types –
  
  *Common stock – most common, voting rights, dividends less certain*
  
  *Preferred Stock – no voting rights, dividends more certain*
The System is Very Resilient
Scoring Stocks

• The stock’s price.
• DIV = Dividend paid during year per share. Companies don’t have to pay DIV.
• Yld = Yield by diving stock price by DIV. What is your return of the stock.
• Price to Earnings Ratio (P/E). Sometimes you will find TTM meaning earnings per share from past 12 months was used to find (P/E). Lower # the better.
• EPS = Earnings Per Share.
• Beta = Stock price risk. < or > 1.0
• Market Cap = Share price times outstanding stock
Growth Stocks

• Companies that have potential for substantial growth in the future.
• Often newer companies.
• Outperforming the rest of the market.
• These companies will often reinvest their profits and not pay dividend.
Income Stocks

- Slow and steady companies.
- Will provide small yet solid growth over time.
- Will often pay out dividends to investors.
Value Stocks

• Undervalued companies.
• That will bring long term value.
• Sometimes it’s a company that had a short-term challenge but is otherwise sound.

Bond (Debt)

- A company or governmental agency sells debt in the form of a bond to fund capital project.
- Bond is sold at set price to paid by investor.
- In exchange the investor receives what they paid + a fixed interest rate after fixed number of years.
- The value of bond goes UP when interest rates goes DOWN.
- When interest rates go UP the value of a bond goes DOWN.

Stuff

- Commodities funds and futures
- Metals
- Currencies like......

- **CRYPTOCOIN**
  - Bitcoin & so many others

Drafted K. Kwa Jitahidi 04/26/21
Real Estate

- Includes land and the buildings that sit on top of it.
- Driven by supply and demand.
- Land is finite, making it very valuable.
Investment Groupings

• Exchange-Trade Funds vs. Mutual Funds.
• Private Equity Firm vs. Hedge Fund.
• Investment clubs.
Exchanges vs. Indexes

• An exchange is the marketplace where companies, investors, and government regulators combine to buy and sell assets.
• The main U.S. exchanges: NYSE & NASDAQ.
• An Index tracks the value of a group of specific assets.
• Dow Jones Industrial 30, S & P 500 are indexes.
Great Sites for Research
